Education

NTU "KhPI". Computer Science, Master.

Work experience

Full Stack, MEAN stack developer

from 10.06.2016 to 20.10.2016 (4 months)
DA-14 Corp., Харьков (Outsourcing software development company)
Stack: Javascript, NodeJS, Angular 1.4, Phonegap, SocketIO

My duties included:
- participation in daily meetings with customers
- creation of authorization, authentication sections and skeletons of the server and client parts for the MVP service for sharing 3D templates and product drawings, similar to a Google spreadsheet
- bugfix for the security app on Phonegap

Front End, AngularJS developer

с 20.02.2017 по 30.08.2017 (6 months)
NIX SOLUTIONS, Харьков (Outsourcing software development company)
Stack: Javascript, Angular 1.5, Bootstrap 2.*

On the project, I performed the following functions:
- participated in meetings at which we tried to find out ways to finish the project faster
- the work was simple: I wrote the client part for CRUD requests using Angular
- in the adaptation period, made an application for even distribution of costs for companies of tourists who go on joint trips

Front End, Angular 1.* developer

с 05.10.2018 по 04.02.2019 (3,5 months)
Forma Pro, Харьков (Outsourcing and outstaffing software development)
Stack: PHP 7.4, Opencart 2.3/3, API integrations

Participated as a Front End Developer in the development of a large well-known advertising platform.

PHP - Opencart developer

с 15.03.2021 по 20.02.2022 (11,5 months)
Rubika Agency, Харьков (Outsourcing software development company)
Stack: PHP 7.4, Opencart 2.3/3, API integrations
On the project, I performed the following functions:
1. participation in discussions of business requirements with clients
2. estimation of the duration of the development of the project or tasks
3. creating from scratch online stores on Opencart
4. support of existing online stores on Opencart
5. integration of third-party APIs and writing modules from scratch
6. creation of a password manager and project deployment monitoring service for internal company

Additional experience

In 2020, I was repairing computers and reinstalling Windows with a home visit (70-80 clients were). Also during this year I created 3 Wordpress sites and set up Google Adwords for 4 sites.

Interesting Pet projects: I made a platform for winding up listening to songs for a better (higher) ranking of artists' songs in the general list of audio recordings on the old VKontakte website. Participated in the Media Hack Weekend 2016 hackathon, where entered the top 30 projects (out of ~100).

Skills

Backend development:
- PHP, Ruby, Nodejs, SQL, Opencart, API Integrations, Twig, MySQL, REST

Frontend development:
- CSS3, HTML5, JavaScript, Web Vital Frontend Optimization, Angular 1.x, Underscore, Handlebars, SASS, Bootstrap (2, 3, 5)

General and other technologies:
- Git, git hooks, bash, jekyll, logs, encrypting, UTC standard, package managers, Stripe, Jira, Google Merchant Center, Facebook data feed, VSCode, cron, uml, yaml, json

Achievements at work

- created a modern Opencart payment module for Monobank.
- wrote production code in more than 10 projects that are still working.

- raised (in the team) Web Vital performance from the red zone (10) to the green zone (95) for one of the largest Ukrainian online stores of construction tools.
- Since I have worked in different roles, performed different functions and used different technologies in both back-end and client-side, I have a broader view of software development.

English

I read technical documentation and technical articles easily. Watch movies in the original with English subtitles with a little effort. I can conduct an oral dialogue on a technical topic with minor difficulties and errors.

Job expectations

- moderate load
- friendly team
- good management
- product company would be a plus
